Test Item: Recyclability Assessment	Result
Sample Description: Film	Recyclable
Standard: EN 13430:2004(see note 1)	

Assessment Summary:

The sample is made of >99% PE, according to RecyClass Recyclability Methodology Version 2.1, there is plastic recycling pathway for PE. According to the Design for Recycling Guildlines- Natural PE Flexible Films for Household and Commercial Packaging (Last update: March 2026), the content of PE is fully compatible with the recycling process. The Materials satisfy the recycling process of EN 13430: 2004.

The total (Pb + Cd + Cr VI + Hg) satisfies the Regulation (EU) 2025/40 (Packaging and Packaging Waste Regulation, PPWR), which meets the standard EN 13430: 2004.

The colour is unpigmented and transparent. The packaging surface is larger than 100cm², additives added do not increase the density higher than 0.97g/cm³. It can be collected and sorted from the waste stream according to Design for Recycling Guildlines- Natural PE Flexible Films for Household and Commercial Packaging (Last update: March 2026). The structure satisfies the collecting and sorting process of EN 13430: 2004.

To sum up, the sample is recyclable according to EN 13430: 2004.

Note:

1. According to Approval of the draft Commission Notice on the Guidance document for Regulation (EU) 2025/40 on packaging and packaging waste (Brussels, 30.3.2026 C (2026) 2151 final), until the date of application of Article 6(2)(a) of the PPWR on design for recycling requirements, manufacturers must comply only with the recyclability requirement in accordance with the PPWD and the related harmonised standard EN 13430:2004 - Requirements for packaging recoverable by material recycling.
2. The result will no longer applicable when the structure design of the sample is changed or assembled with other components into post process products.

EN 13430:2004 Table C.1		
Criteria	Response	Reference
1 Is design and control of all stages of production, packing/filling including the materials used sufficient to maintain the suitability of the packing for the recycling process?	Satisfied.	The sample is made of >99% PE, according to RecyClass Recyclability Methodology Version 2.1, there is plastic recycling pathway for PE. According to the Design for Recycling Guidelines- Natural PE Flexible Films for Household and Commercial Packaging (Last update: March 2026), the content of PE is fully compatible with the recycling process. The Materials satisfy the recycling process of EN 13430: 2004. The total (Pb + Cd + Cr VI + Hg) satisfies the Regulation (EU) 2025/40 (Packaging and Packaging Waste Regulation, PPWR), which meets the standard EN 13430: 2004.
2 Does the design and control of components used and of the method of construction facilitate effective empty?	/	The product be packaged is uncertain, this item has not been tested.
3 Does the design and control of components used and of the method of construction facilitate the end-user role of separation, when necessary to assist collection?	Satisfied.	It is single component, which is easy for end-users to separate and collect.
4 Does the design and control of components used and the method of construction ensure compatibility with collection and sorting systems?	Satisfied.	The colour is unpigmented and transparent. The packaging surface is larger than 100cm ² , additives added do not increase the density higher than 0.97g/cm ³ . It can be collected and sorted from the waste stream according to Design for Recycling
